primedocs

A selection of possible use cases

Word

Content Blocks: Whether individually per user or centrally controlled - simply use drag and drop to select the correct wording, ensuring legal compliance and consistent communication

PowerPoint

Digitaler Assistent: Guides you step-by-step through the presentation creation process, gathers all relevant content and criteria and generates a complete PowerPoint - without manual fine-tuning.

Outlook

Email Signatures and Banners: primedocs enables the central management of signatures and banners including target-group-specific campaign logic.
This ensures that every email uses the correct, corporate-design-compliant signature and the right campaign.

Excel

Guaranteed consistent Corporate Design:
Tables, charts and entire reports automatically adhere to your corporate design - with correct logos, fonts, colours and formats - ensuring every Excel report looks professional internally and externally.

Teams & SharePoint

Document creation in Teams and SharePoint:
Directly in your familiar environment, you create business documents quickly and 100% in corporate design. primedocs provides central templates and automatically applies correct logos, colours, and formatting - without manual effort.

Copilot

Copilot-supported presentation creation:
Microsoft 365 Copilot generates content and structure and primedocs automatically applies the correct corporate design.
This creates professional, CI/CD-compliant presentations in seconds - without manual adjustments.
